

Schedule of Required Immunizations

New York State Public Health Law requires that all children attending a school be immunized against diphtheria, poliomyelitis, measles, rubella and mumps.

All Children born after 01/01/93 must be immunized for Hepatitis B. Seventh graders entering school on or after 09/01/2000 must be immunized for Hepatitis B.

Children entering school that were born on or after 01/01/1998 must be immunized for Varicella.

It is the responsibility of the parent/guardian of the child to make arrangements for these immunizations and provide printed evidence to school nursing personnel.
