Students

**SUBJECT:** Supervision of Students

Students participating in any school-sponsored activity must be supervised by the teacher/coach/staff member in charge of the activity. This applies to all activities and the permission to hold practices or meetings must not be granted unless a teacher/staff member is definitely in charge.

District personnel are responsible for the:

- a) supervision of all students in their class, on field trips, or their school-sponsored after school activities.
- b) supervision of their students through the end of the activity. This may entail bus duty or making sure students have transportation home and remaining with students until all students have been picked up.
- c) playground supervision of all children under their jurisdiction during the recess periods. The principal will assign this responsibility.

Students are not to be sent on any type of errand away from the building unsupervised.
